

About the Fact Sheets

The *Fact Sheets* contain general information to increase knowledge and understanding of the characteristics, contributing factors, and treatment approaches related to juvenile sex offenders. The *Fact Sheets* also provide information regarding current statistics and trends, as well as specific legislation that affects this population.

It is important to note that these *Fact Sheets* simply provide basic statistics and brief information to aid in developing initial knowledge and as such, caution must be used to ensure a firm understanding of the broader meaning of the material. The *Fact Sheets* are intended for quick reference following completion of the *Juvenile Sex Offender Training Curriculum*. If you have not already completed the curriculum, please see the *Training Curriculum* section of this site to register and get started.

References for each of the fact sheets can be found in each individual session of the *Training Curriculum*.
